

# Electric Water Heater Design

BY:Omar Ehab  
Abdelaziz

# System Block diagram

# Static Design

# Modules detailed design

## SW module

- SW\_Init
- SW\_Get\_state
- SW\_update

## Temp Set module

- Tempset\_init
- Tempset\_setstate
- Tempset\_settemp
- Tempset\_getstate
- Tempset\_gettemp
- Tempset\_update

## On/Off module

- Heaterstate\_init
- Heaterstate\_setstate
- Heaterstate\_getstate
- Heaterstate\_update

## LM35 module

- Lm35\_init
- Lm35\_set\_currentTemp
- Lm35\_get\_currentTemp
- Lm35\_update

## EEPROM module

- EEPROM\_read
- EEPROM\_Write

## Heater cooler module

- Heater\_init
- Heater\_set\_state
- Heater\_get\_state
- Heater\_update

- cooler\_init
- cooler\_set\_state
- cooler\_get\_state
- cooler\_update

## Display module

- Display\_init
- Display\_update

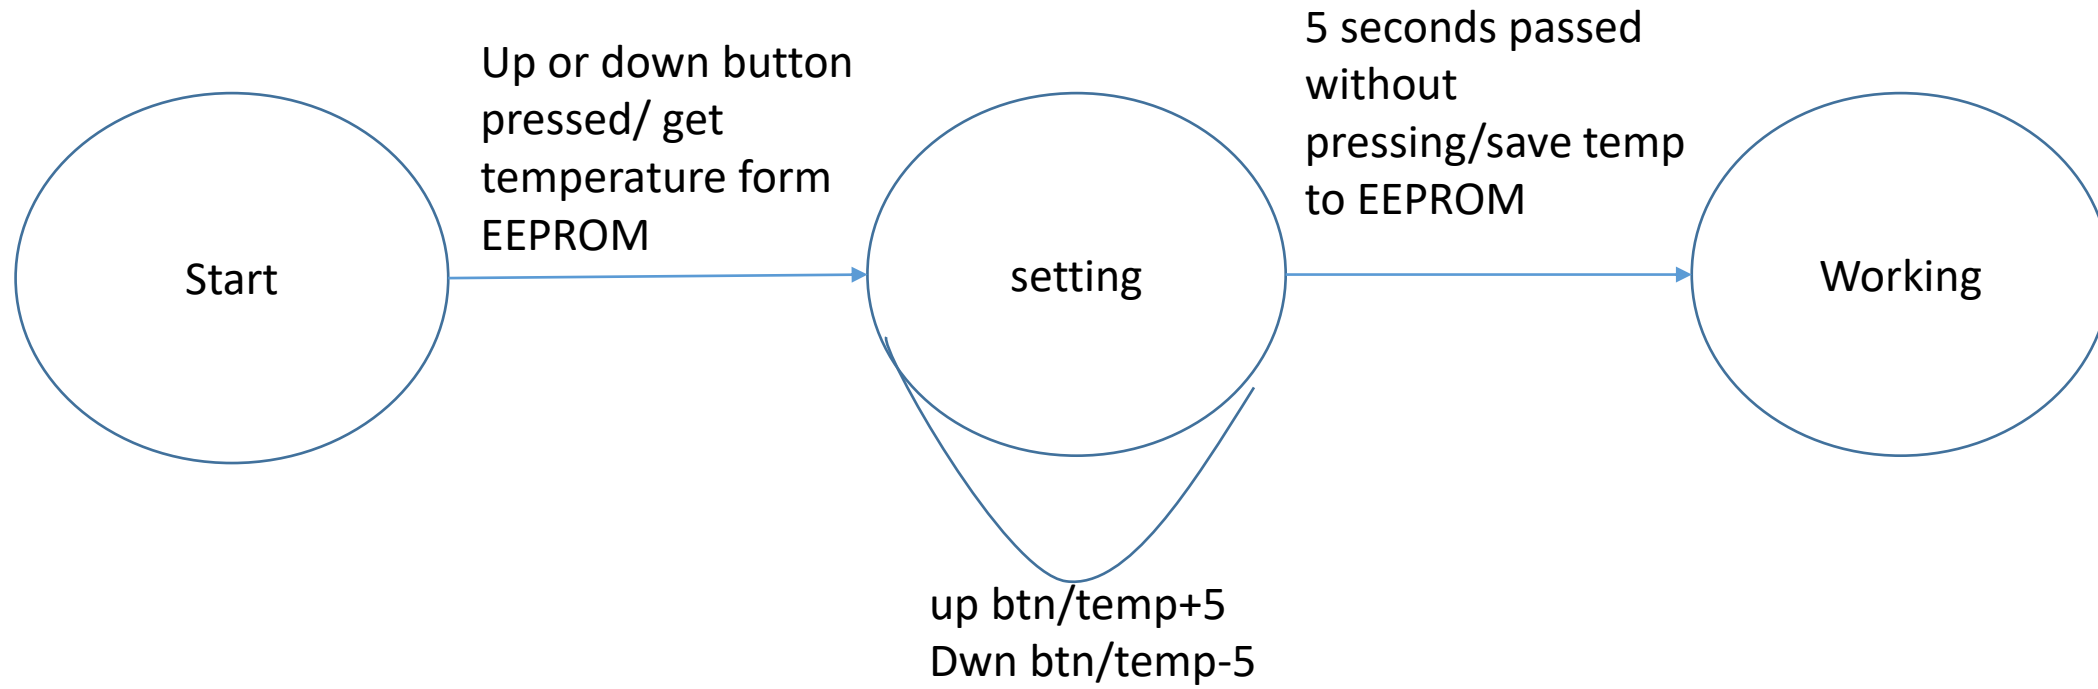

## SSD module

- SSD\_init
- SSD\_setvalue
- SSD\_getvalue
- SSD\_setstate
- SSD\_getstate
- SSD\_update

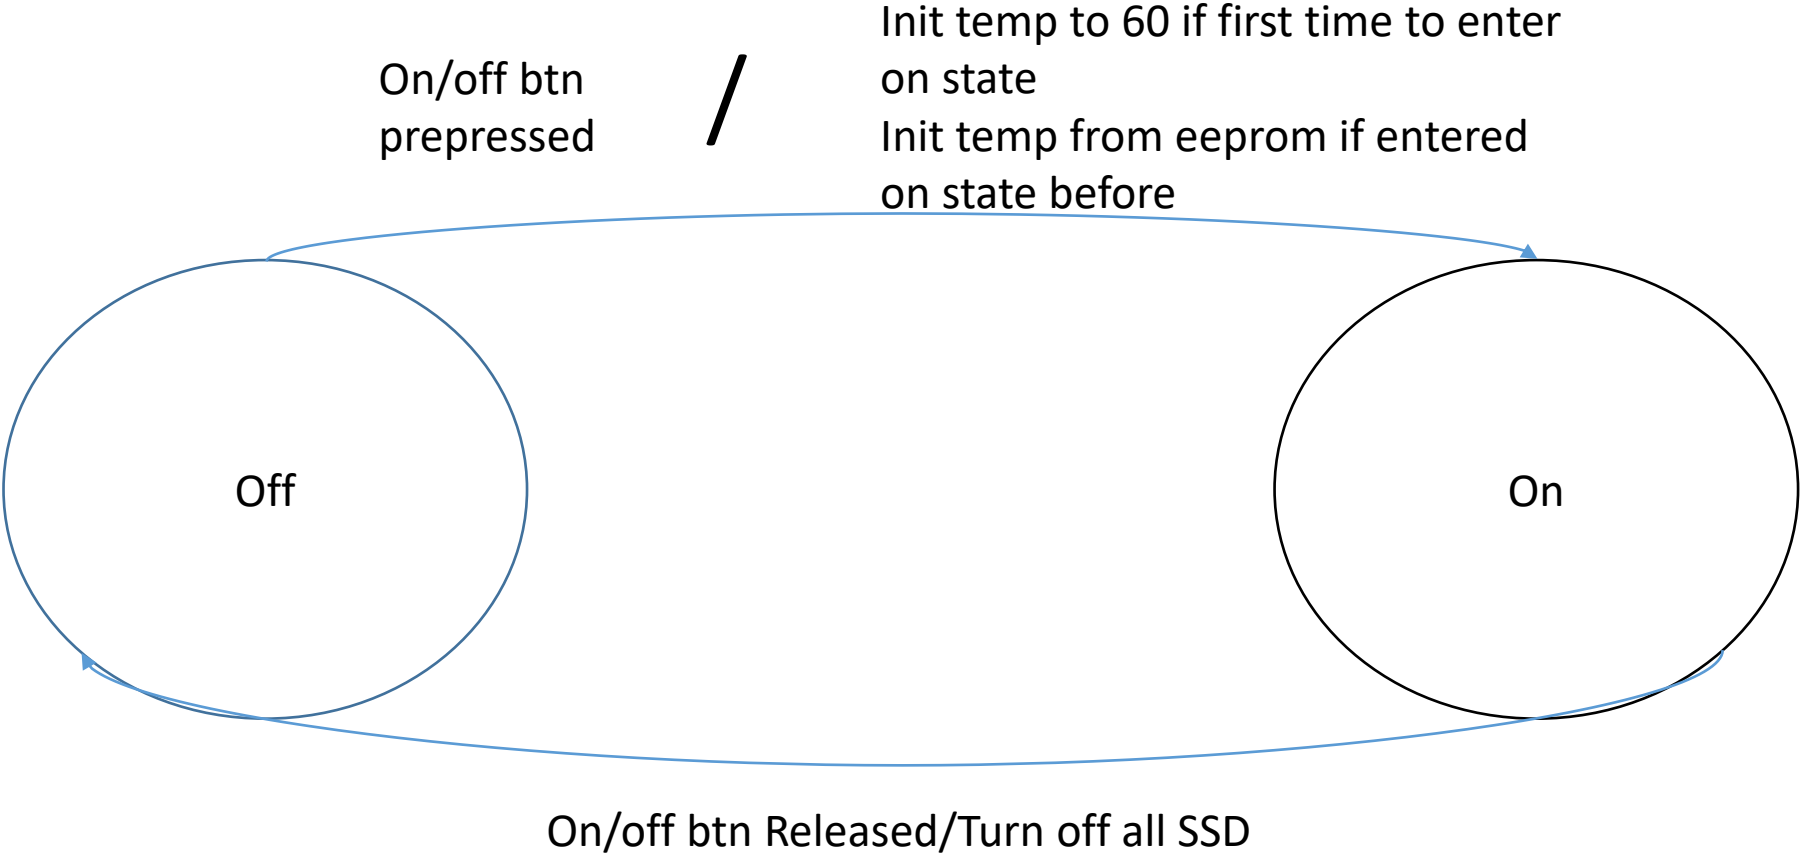

## LED module

- Led\_init
- Led\_setstate
- Led\_getstate
- Led\_update

## Temp set module state machine

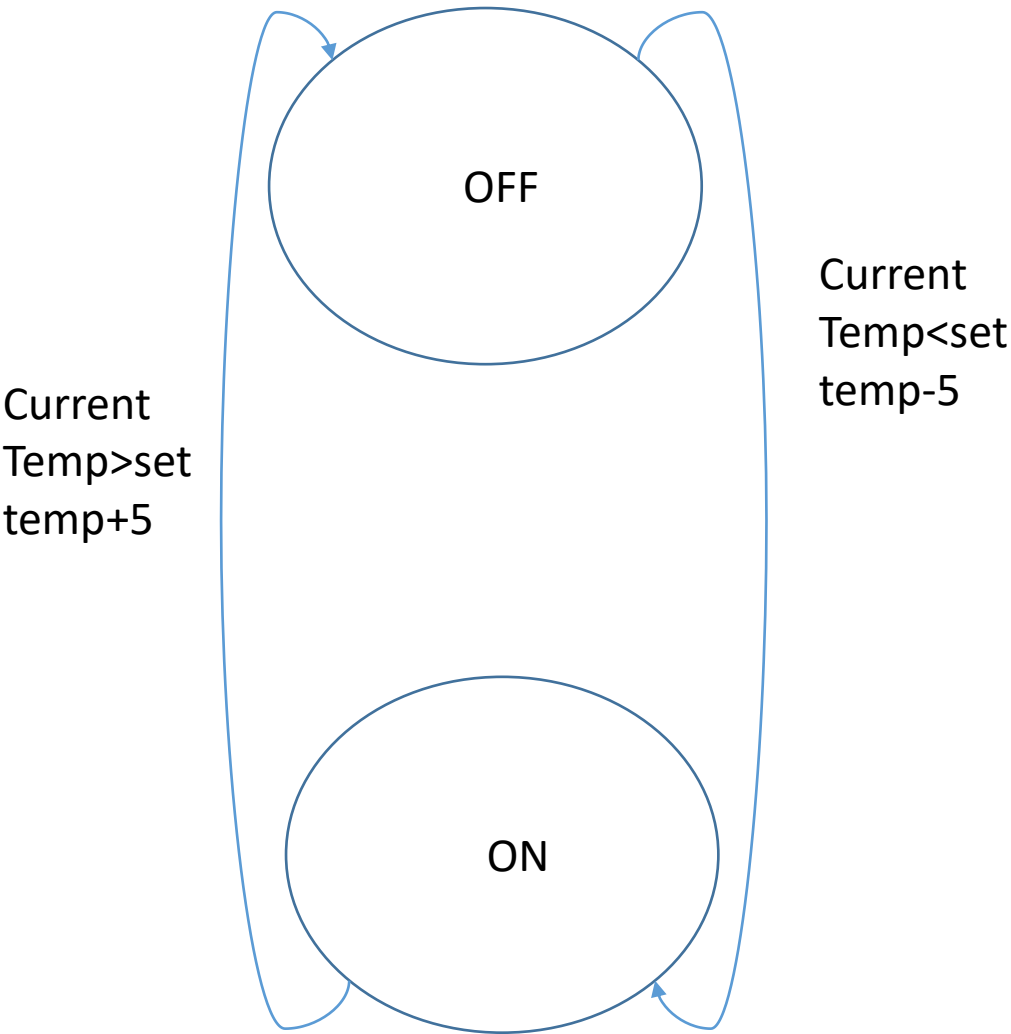

# On/Off module state machine

# Heater Cooler module state machine

## Heater

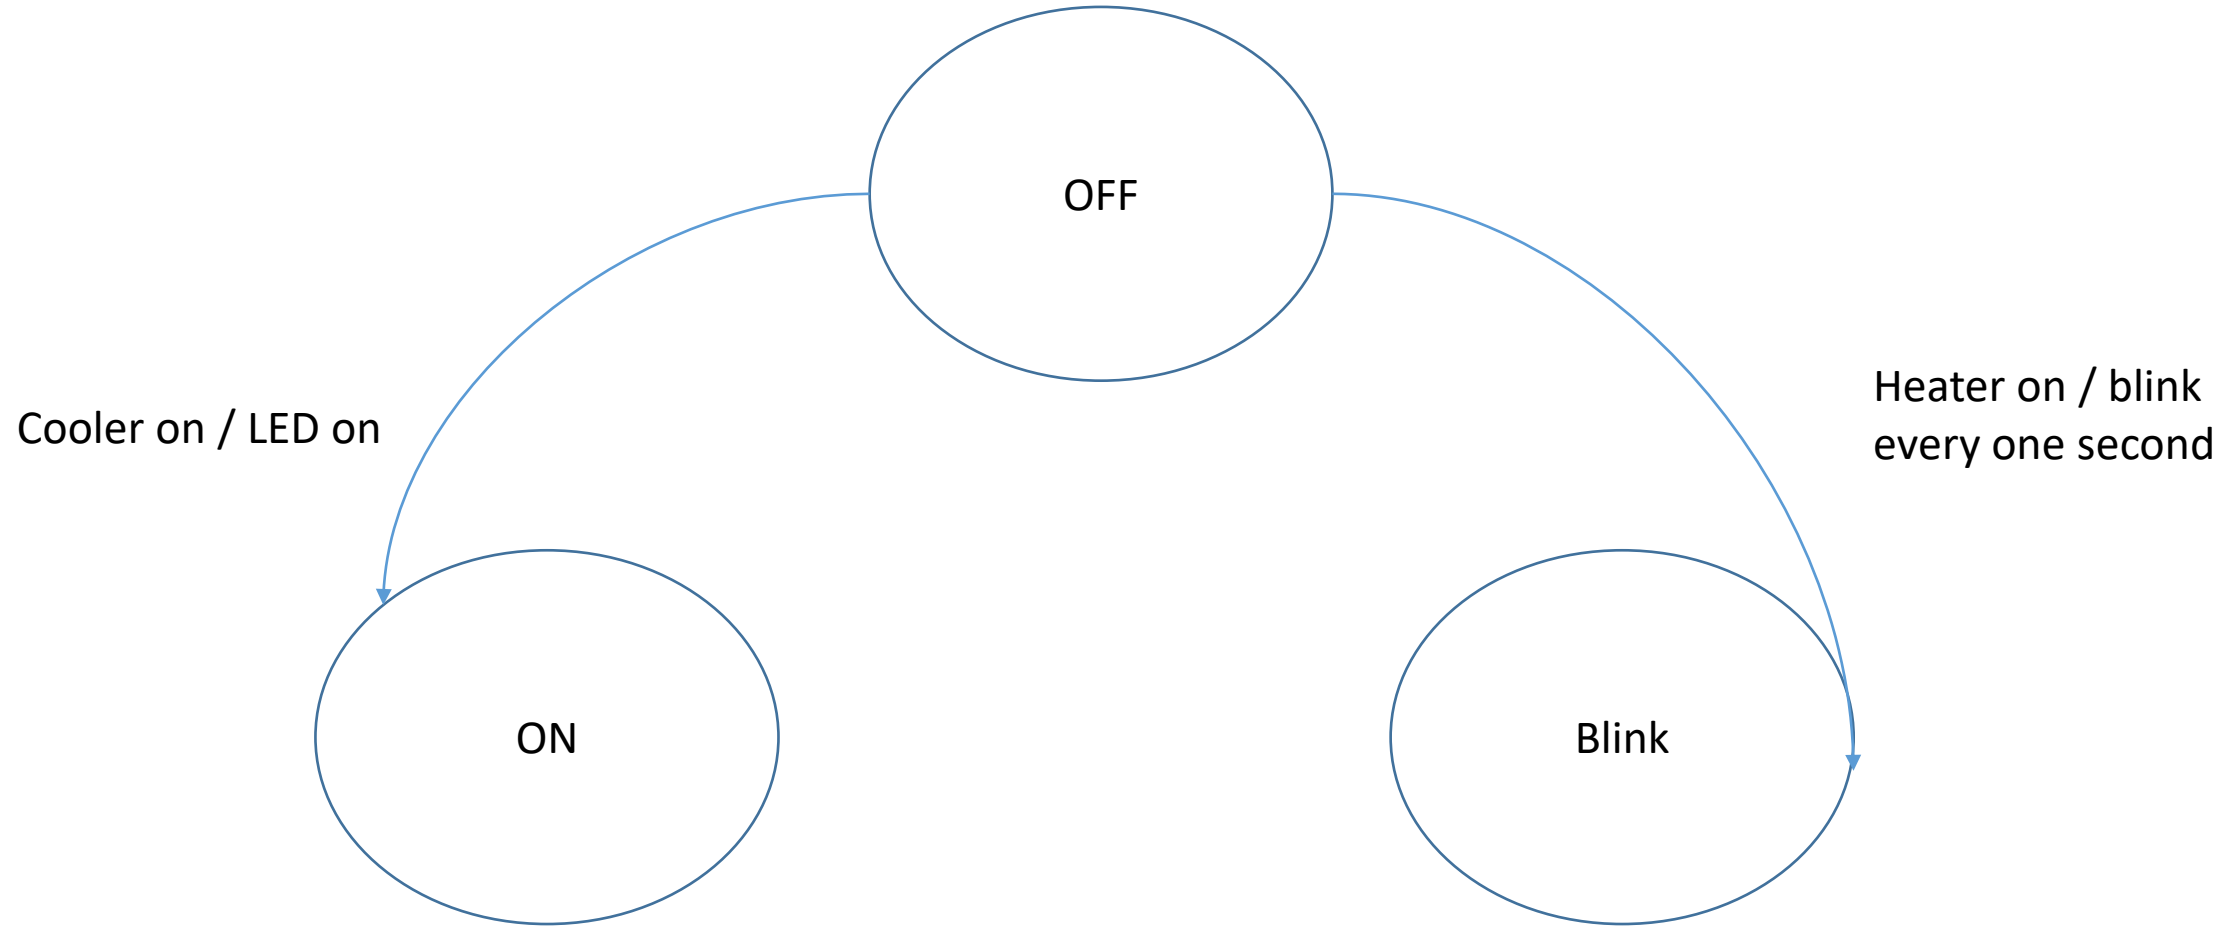

## Cooler

## LED Module State machine

# Dynamic Design

# Timing analysis

Task	Actions	BCET ms	WCET ms	Period of action(ms)	Period(ms)
SSD	Update temp	0	0	20	20
SW	Update samples	0	0	20	20
	Update states	0	0	20	
On/Off	Update states	0	0	20	20
Temp set	Check SW state	0	0	20	20
Temp sense	Update water temp	0	0	100	100
Heater cooler	Update state	0	0	100	100
Display	Check heater state	0	0	20	20
	Blink	0	0	1000	
	Update Temp	0	0	20	

Tick(ms)=20

Major cycle(ms)=100

# Schedulability Check
